

DEBRIS NETTING

MODU-LOC
FENCE RENTALS

ANYTIME. ANYWHERE.

Modu-Loc offers an affordable, lightweight and durable polyethylene debris netting to help contain dust and debris on active construction sites. Modu-Loc's debris netting is versatile, as it can be hung horizontally or vertically and may be cut to length without running.

SPECIFICATIONS - our green debris netting is 6' tall and available in 150' rolls

FLAME RESISTANT - passes flame resistant (FR) NFPA 701-10 testing

PROVIDES DUST CONTROL and contains debris, protecting site workers and the public

EDGES FINISHED WITH EYELETS for easy installation

The installation of any additional materials or screening to any temporary structure will increase the structural and environmental loads. We recommend using stability accessories such as wind braces or sandbags when hanging screen or banners on our fence.

16 locations throughout Canada providing nationwide service
